

TOWN OF THREE RIVERS

Safety Policy

Policy Number: TRHR-8 Date of Approval: May 13, 2019

Approved By: Town Council Date of Review: May 19, 2022

The Town of Three Rivers is committed to the establishment of a safe, secure working environment for all of its employees. To this end the Town of Three Rivers conscientiously supports an effective safety program and will work to ensure compliance with all appropriate legislation. The promotion of elimination of personal injury and property damage is the cornerstone of our daily operation.

The safety and well-being of all Town employees is management's primary responsibility. This responsibility will be measured through the promotion of safe work practices by all employees and maintaining all equipment in safe operating condition. To accomplish this management will provide all reasonable safeguards to ensure safe working conditions and the occupational health of all employees.

Every employee has the responsibility to follow correct safe work procedures, to adhere to safety rules and regulations, report all unsafe work concerns and to support Town Safety Initiatives.

It is my personal request that all employees work together in a responsible manner to achieve our safety objective of an accident-free business.
